

How To

How To Configure Email?

This email setting is required for system to send email properly when certain events occurred: reseller/customer registration, product order, payment confirmation, etc.

You can use any email account that allows you to send mail through SMTP like your own email address from your company or from any free email services (eg. Gmail, Yahoo Mail, etc).

To start configure your email, login to your reseller account and go to **Configuration - Email** menu. Email configuration is pretty similar to any email reader software like Microsoft Outlook or Apple Mail.

The image shows a screenshot of an email configuration interface. It contains the following fields and controls:

- Email Username:** A text input field containing "johndoe@example.com".
- Password:** A text input field with masked characters (dots).
- SSL:** A checkbox labeled "Enable SSL" which is currently unchecked.
- Mail From:** A text input field containing "John Doe".
- SMTP Server:** A text input field containing "example.com".
- Port:** A text input field containing "25".
- Reply-To:** A text input field containing "Reply-To".
- Save:** A green button with the text "Save".

If you're using Gmail or Google Apps for your domain, please refer to following settings:

Username: **someone@gmail.com** or **someone@yourdomain.com**

Password: **your Gmail/Google App's password**

SSL: **Enable**

SMTP Server: **smtp.gmail.com**

How To

Port: **465**

Should you experience any problem, please create a [ticket](#) and our staff will gladly help.
